

Zero Waste

Our zero waste actions in „Na Klifie”

“Zero waste” is nothing more than the reduction of waste that we produce in everyday life but also on holiday. The rules are very simple. We should remember to sort out waste correctly, shop consciously and use eco-friendly substitutes. Sometimes even resigning from something is enough. In “Na Klifie” we share reliable zero waste practices with our guests, who can use them if they wish. The most significant ones are listed below.

Sorting out waste

Each house is equipped with separate bins, where organic waste, plastic, and metal (the type of waste most frequently produced on holiday) should be binned. Other waste types (paper, glass) should be binned to containers placed outside on the premises of the complex.

To facilitate the decision on, where to bin what, in each kitchen and bathroom there is a transparent infographic on how to sort out waste.

Reduction of waste

In each house our guests can find recyclable dishes and objects made from biodegradable materials, including: a linen bag for bread/bread rolls, lunch/shopping boxes, hempen washcloth, eco-friendly washing-up liquid, filter kettle, recyclable paper, eco-friendly washing agents – all available in the public laundry.

Everybody can buy a reusable bottle in reception.

Education and entertainment

Our guests have the opportunity to learn how to prepare eco-friendly washing powder and get familiar with the rules of composting.

Our guests can use the library with many interesting books. We believe that it’s better to borrow than buy! Our books cover multiple various topics, ranging from ecology, zero waste, healthy eating, self-development, crime novels, love stories, modern literature to children books. We believe that everybody will find something to their taste!

If you want to leave the book you’ve read and share it with other guests, we are more than willing to take it!

On sunny days we would encourage you to visit Rewal by bike. Therefore, we offer our guests special discounts on bikes and other bike accessories in bike rental shop nearby.

The “Na Klifie” Bar

In our summer bar we don’t use plastic and we offer reusable dishes. If someone wants to take the meal or a drink away, we offer biodegradable packaging made from bran and paper. We suggest drinking without a straw and we provide a paper or a stainless steel straw only at client’s request (steel straws can be washed in the dishwasher and used multiple times).

When the client brings their own mug to be filled with our aromatic coffee, we offer an extra discount!

What else can we do?

If you have an idea, what else we can do for the environment or you think that we've overlooked an important element of zero waste holidays, contact us at: biuro@na-klifie.pl and share your opinion with us! We're open to your suggestions and ready to add some new rules that we will be able to follow to our list.
